• EMPOWERING CHILDREN AND SCHOOLS •

Version	Date	Author	Summary of Changes
1.0	July 2025	Governance Manager	Annual review. Policy aligned with Department for Education statutory guidance on supporting pupils with medical conditions.
2.0	July 2026	Governance Manager	Annual review. Clarified governance responsibilities for the Trust Board, CEO, Local Governing Bodies and Headteachers. Expanded guidance on Individual Healthcare Plans (IHPs), medicines management, parental responsibilities, record keeping and GDPR compliance. Added Early Years (EYFS) procedures for obtaining and recording medical information. Introduced a new appendix on procedures for children who are sick or infectious. Updated linked policies and terminology throughout to improve clarity and reflect current practice. No substantive changes to the Trust's overall approach. Policy will be reviewed further following implementation of the Department for Education's new statutory guidance on allergy safety and supporting pupils with medical conditions.

This policy sets out our approach to supporting pupils with medical conditions across SECAT.
The named person for implementing this policy at SECAT is Ben Stickley, CEO.

1. Aims

At SECAT we understand that medical conditions requiring support at school can affect quality of life and may be life-threatening.

Our school will support pupils with medical conditions so that they have full access to education, including school trips and physical education.

This policy aims to:

- Make sure that pupils, staff and parents/carers understand how our school will support pupils with medical conditions

- Set out the roles and responsibilities for everyone in the school community in regard to pupils with medical conditions
- Set out the procedure for creating, reviewing and managing individual healthcare plans (IHPs)
- Set out how we will manage medicines in school
- Reassure parents/carers that the school will help their child feel safe, supported and included

2. Legislation and statutory responsibilities

This policy meets the requirements under [Section 100 of the Children and Families Act 2014](#), which places a duty on the board of trustees to make arrangements for supporting pupils at their school with medical conditions.

It is also based on the statutory guidance on [supporting pupils with medical conditions at school](#) and the Early Years Foundation Stage statutory framework from the Department for Education (DfE).

This policy also complies with our funding agreement and articles of association.

3. Roles and responsibilities

3.1 The board of trustees

The board of trustees has ultimate responsibility to make sure there are arrangements to support pupils with medical conditions across the trust. Although the trust delegates certain duties to different levels as outlined below, the board is still accountable for making sure the trust is compliant with the requirements in the above legislation and guidance.

The board will also determine and approve this policy.

3.2 CEO

The CEO will:

- Oversee and support the headteachers of each school in carrying out their duties
- Highlight any issues found across the trust to the board of trustees

3.3 Local governing bodies

Local governing bodies of each school will:

- Monitor practice, and staff training, in regard to pupils with medical conditions, in line with this policy

3.4 The headteacher

The headteacher of each school will:

- Make sure all staff are aware of this policy and understand their role in its implementation
- Make sure that there is a sufficient number of trained staff available to implement this policy and deliver against all individual healthcare plans (IHPs), including in contingency and emergency situations
- Make sure that all staff who need to know are aware of a child's condition
- Take overall responsibility for the development and monitoring of individual healthcare plans (IHPs)

- Make sure that school staff are appropriately insured and aware that they are insured to support pupils in this way
- Manage cover arrangements in the case of staff absence or turnover, to make sure a suitable staff member is always available, and supply staff are briefed appropriately about pupils' medical needs
- Approve risk assessments for school visits and school activities outside the normal school timetable that involve provision for pupils with medical conditions
- Contact the school nursing service in the case of any pupil who has a medical condition that may require support at school, but who has not yet been brought to the attention of the school nurse
- Make sure that systems are in place for obtaining information about a child's medical needs and that this information is kept up to date
- Implement systems for obtaining information about a child's needs for medicines and keeping this information up to date

3.5 Staff

Supporting pupils with medical conditions during school hours is not the sole responsibility of 1 person. Any member of staff at the school may be asked to provide support to pupils with medical conditions, although they will not be required to do so. This includes the administration of medicines and includes implementing systems for obtaining information about a child's needs for medicines and keeping this information up to date.

Those staff who take on the responsibility to support pupils with medical conditions will receive sufficient and suitable training, and will achieve the necessary level of competency before doing so.

Teachers will take into account the needs of pupils with medical conditions that they teach. All staff will know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.

3.6 Parents/carers

Parents/carers will:

- Provide the school with sufficient and up-to-date information about their child's medical needs
- Provide evidence of appropriate prescription and written permission for medicines to be administered by staff
- Be involved in the development and review of their child's IHP, and may be involved in its drafting
- Carry out any action they have agreed to as part of the implementation of the IHP, e.g. provide medicines and equipment, and ensure they or another nominated adult are contactable at all times
- Be responsible for ensuring medication is in date.

3.7 Pupils

Pupils with medical conditions will often be best placed to provide information about how their condition affects them. Pupils should be fully involved in discussions about their medical support needs and contribute as much as possible to the development of their IHPs. They are also expected to comply with their IHPs.

3.8 School nurses and other healthcare professionals

Our school nursing services will notify the relevant school when a pupil has been identified as having a medical condition that will require support in school. This will be before the pupil starts school, wherever possible. They may also support staff to implement a child's IHP.

Healthcare professionals, such as GPs and paediatricians, will liaise with our school nurses and notify them of any pupils identified as having a medical condition. They may also provide advice on developing IHPs.

4. Equal opportunities

The trust will adhere to the legal responsibilities under the Equality Act 2010 and will not unlawfully discriminate against any pupils. Our trust is clear about the need to actively support pupils with medical conditions to participate in school trips and visits, or in sporting activities, and not prevent them from doing so.

The trust and the individual school will consider what reasonable adjustments need to be made to enable these pupils to participate fully and safely on school trips, visits and sporting activities.

Risk assessments will be carried out so that planning arrangements take account of any steps needed to ensure that pupils with medical conditions are included. In doing so, pupils, their parents/carers and any relevant healthcare professionals will be consulted.

5. Being notified that a child has a medical condition

When the school is notified that a pupil has a medical condition, the process outlined in Appendix 1 will be followed to decide whether the pupil requires an IHP.

The school will make every effort to ensure that arrangements are put into place within 2 weeks, or by the beginning of the relevant term for pupils who are new to the school.

EYFS settings: 5.1 Obtaining information about medicines

The school will:

- For new starters, send a form to all parent/carers of pupils after their place at the school has been confirmed, but before their first school year starts, to confirm any medicine(s) their child needs. Where a pupil has a new diagnosis and/or a pupil has moved to the school mid-term, we will send a form and put arrangements in place within 2 weeks
- Send a reminder to parents/carers at the start of each year in a newsletter, as well as a form to complete, if their child requires certain medicine(s)

We ask that parents/carers proactively inform us by either phone call to the school or an email to if their child's medical needs change during the school year.

The school phone number and email address will be detailed in each school's appendix to this Trust policy.

6. Individual healthcare plans

The headteacher has overall responsibility for the development of IHPs for pupils with medical conditions.

If this responsibility has been delegated to another member of staff it will be detailed on the school's appendix to this policy.

Plans will be reviewed at least annually, or earlier if there is evidence that the pupil's needs have changed.

Plans will be developed with the pupil's best interests in mind and will set out:

- What needs to be done
- When
- By whom

Not all pupils with a medical condition will require an IHP. It will be agreed with a healthcare professional and the parents/carers when an IHP would be inappropriate or disproportionate. This will be based on evidence. If there is no consensus, the headteacher will make the final decision.

Plans will be drawn up in partnership with the school, parents/carers and a relevant healthcare professional, such as the school nurse, specialist or paediatrician, who can best advise on the pupil's specific needs. The pupil will be involved wherever appropriate.

The level of detail in the plan will depend on the complexity of the child's condition and how much support is needed. The SECAT Trust Board and the Headteacher or a delegated member of staff (named in the school's appendix to this policy) with responsibility for developing IHPs, will consider the following when deciding what information to record on IHPs:

- The medical condition, its triggers, signs, symptoms and treatments
- The pupil's resulting needs, including medication (dose, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and environmental issues, e.g. crowded corridors, travel time between lessons
- Specific support for the pupil's educational, social and emotional needs. For example, how absences will be managed, requirements for extra time to complete exams, use of rest periods or additional support in catching up with lessons, counselling sessions
- The level of support needed, including in emergencies. If a pupil is self-managing their medication, this will be clearly stated with appropriate arrangements for monitoring
- Who will provide this support, their training needs, expectations of their role and confirmation of proficiency to provide support for the pupil's medical condition from a healthcare professional, and cover arrangements for when they are unavailable
- Who in the school needs to be aware of the pupil's condition and the support required
- Arrangements for written permission from parents/carers and the headteacher for medication to be administered by a member of staff, or self-administered by the pupil, during school hours
- Separate arrangements or procedures required for school trips or other school activities outside of the normal school timetable that will ensure the pupil can participate, e.g. risk assessments
- Where confidentiality issues are raised by the parent/carer or pupil, the designated individuals to be entrusted with information about the pupil's condition
- What to do in an emergency, including who to contact, and contingency arrangements

7. Managing medicines

Prescription and non-prescription medicines will only be administered at the school:

- When it would be detrimental to the pupil's health or school attendance not to do so, **and**
- Where we have parents/carers' written consent

The person administering the medicine will keep a written record. Parents/carers will always be informed on the same day the medicine has been administered, or as soon as reasonably possible.

The only exception to this is where the medicine has been prescribed to the pupil without the knowledge of the parents/carers.

Pupils under 16 will not be given medicine containing aspirin unless prescribed by a doctor.

Anyone giving a pupil any medication (for example, for pain relief) will first check recommended and maximum dosages for the pupil's age, and when the previous dosage was taken.

Medicine (both prescription and non-prescription) must only be administered to a child where written permission for that medicine has been obtained from the child's parent and/or carer.

Schools will only accept prescribed medicines that are:

- In-date
- Labelled
- Provided in the original container, as dispensed by the pharmacist, and include instructions for administration, dosage and storage

Schools will accept insulin that is inside an insulin pen or pump rather than its original container, but it must be in date.

All medicines will be stored safely. Pupils will be informed about where their medicines are at all times and be able to access them immediately. Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenaline pens will always be readily available to pupils and not locked away.

Medicines will be returned to parents/carers to arrange for safe disposal when no longer required.

7.1 Controlled drugs

Controlled drugs are prescription medicines that are controlled under the Misuse of Drugs Regulations 2001 and subsequent amendments, such as morphine or methadone.

A pupil who has been prescribed a controlled drug may have it in their possession if they are competent to do so, but they must not pass it to another pupil to use. All other controlled drugs will be kept in a secure cupboard in the school office and only named staff will have access.

Controlled drugs will be easily accessible in an emergency and a record of any doses used and the amount held will be kept.

7.2 Pupils managing their own needs

Pupils who are competent will be encouraged to take responsibility for managing their own medicines and procedures. This will be discussed with parents/carers and it will be reflected in their IHPs.

Pupils will be allowed to carry their own medicines and relevant devices wherever possible.

IHPs will include procedure for staff to follow if a pupil refuses to carry out a necessary procedure or take medicine.

7.3 Unacceptable practice

Although school staff will use their discretion and judge each case on its merits with reference to the pupil's IHP, they will keep in mind that it is not generally acceptable practice to:

- Prevent pupils from easily accessing their inhalers and medication, or administering their medication when and where necessary
- Assume that every pupil with the same condition requires the same treatment
- Ignore the views of the pupil or their parents/carers
- Ignore medical evidence or opinion
- Send children with medical conditions home frequently for reasons associated with their medical condition or prevent them from staying for normal school activities, including lunch, unless this is specified in their IHPs
- Send an ill pupil to the school office or medical room unaccompanied or with someone unsuitable (e.g. a fellow pupil who is not old or responsible enough)

- Penalise pupils for their attendance record if their absences are related to their medical condition, e.g. hospital appointments
- Prevent pupils from drinking, eating or taking toilet or other breaks whenever they need to in order to manage their medical condition effectively
- Require parents/carers, or otherwise make them feel obliged, to attend school to administer medication or provide medical support to their pupil, including with toileting issues. No parent/carer should have to give up working because the school is failing to support their child's medical needs
- Prevent pupils from participating, or create unnecessary barriers to pupils participating, in any aspect of school life, including school trips, e.g. by requiring parents/carers to accompany their child
- Administer, or ask pupils to administer, medicine in school toilets

8. Emergency procedures

Staff will follow the school's normal emergency procedures (for example, calling 999). All pupils' IHPs will clearly set out what constitutes an emergency and will explain what to do.

If a pupil needs to be taken to hospital, staff will stay with the pupil until the parent/carer arrives, or accompany the pupil to hospital by ambulance.

9. Training

Staff who are responsible for supporting pupils with medical needs will receive suitable and sufficient training to do so.

The training will be identified during the development or review of IHPs. Staff who provide support to pupils with medical conditions will be included in meetings where this is discussed.

The relevant healthcare professionals will lead on identifying the type and level of training required and will agree this with the Headteacher or their delegated member of staff (named in the school's appendix to this policy). Training will be kept up to date.

Training will:

- Be sufficient to ensure that staff are competent and have confidence in their ability to support the pupils
- Fulfil the requirements in the IHPs
- Help staff to have an understanding of the specific medical conditions they are being asked to deal with, their implications and preventative measures

Healthcare professionals will provide confirmation of the proficiency of staff in a medical procedure, or in providing medication.

All staff will receive training so they are aware of this policy and understand their role in implementing it – for example, with preventative and emergency measures so that they can recognise and act quickly when a problem occurs. This will be provided for new staff during their induction.

10. Record keeping

The SECAT Trust Board will ensure that written records are kept of all medicine administered to pupils for as long as these pupils are at the school. Parents/carers will be informed if their pupil has been unwell at school.

IHPs are kept in a readily-accessible place that all staff are aware of.

EYFS settings: 10.1 Recording information about medicines

We will:

- Enter each pupil's medicine need in the school's system
- Update our records when parents/carers of pupils inform us of changes to their child's needs
- Keep a record of changes, labelling the most recent record for each child
- Make sure that all staff have access to records so that they are informed about pupils' medical needs
- Securely hold this information digitally in accordance with the UK GDPR
- Inform parents/carers about how they can access their child's information (provided no relevant exemptions apply to their disclosure under the Data Protection Act 2018)

11. Liability and indemnity

The board of trustees will ensure that the appropriate level of insurance is in place and appropriately reflects the trust's level of risk.

The details of the school's insurance policy will be detailed in the individual school appendices to this Trust policy.

All our schools will ensure that we are a member of the Department for Education's risk protection arrangement (RPA).

12. Complaints

Parents/carers with a complaint about the Trust's action in regard to their child's medical condition should discuss these directly with the Headteacher or delegated member of staff named in the school appendix to this policy in the first instance. If the Headteacher or delegated member of staff cannot resolve the matter, they will direct parents/carers to the Trust's complaints procedure.

13. Monitoring arrangements

This policy will be monitored by the headteacher.

It will be reviewed and approved by the SECAT Trust Board every year.

14. Links to other policies

This policy links to the following policies:

- Accessibility plan
- Complaints
- Equal Opportunities policy
- First aid
- Health and safety
- Safeguarding
- Special educational needs policy

14. Links to other policies

This policy links to the following policies:

- Accessibility plan
- Complaints
- Equality information and objectives
- First aid
- Health and safety
- Safeguarding
- Special educational needs information report and policy
- Procedure to prevent the spread of infection

Appendix 1: Being notified a child has a medical condition

Appendix 2: Procedures for children who are sick or infectious

- Pupils who have an infectious disease shouldn't attend school/nursery
- Parents should notify the school if their child has an infectious disease
- If a pupil becomes unwell during the day – for example, they have a temperature, sickness, diarrhoea or stomach pains – the parents or carers will be contacted to collect their child
- Pupils with a temperature, sickness, diarrhoea or an infectious disease should not attend school/nursery while they are sick. Depending on the sickness, staff may ask parents to take their child to the doctor before they return to school
- Staff will notify parents if a risk to other pupils exists

Children with specific infectious diseases set out in the [UK Health Security Agency's exclusion table](#) will not be allowed to return to school/nursery until the appropriate exclusion period has passed.

We will take the following steps to prevent the spread of infection:

- Reducing or eliminating sources of infection through good hygiene practices
- Good handwashing practice
- Encouraging and facilitating healthy eating
- Ensuring that regulated food hygiene standard requirements in the maintenance of food preparation areas and preparation of food are followed
- Championing and educating staff, parents, carers and pupils on the importance of immunisation as a tool against infection (while recognising the individual's right to choose)
- Establishing a daily cleaning routine for:
 - Nappy changing facilities
 - Play areas
 - Toys, activities and equipment
